23 March 2017

Attention: PAMP Partners

SUBJECT: Technical and Trainings Committee Update as of March 2017

Dear Partner,

Warmest greetings!

Updates on the active task forces as follows:

BPS Task Force

- BPS/TF met March 14 at Chilis Greenhills. BPS/TC25, fresh from February's CDO meet during the PICHE National Convention 2017, will meet March 28 at Din Tai Fung Restaurant BGC.
- We are currently working on marine and traffic coatings.
- The parallel teams are down to its last two meetings ending May 2017 completing the list of target products.

EWC Task Force

- This year marks the effectivity of the DENR-CCO for ADH (Architectural Decorative Household) Coatings. The EcoWaste Coalition has been active in doing their task of making sure that this is in fact complied with.
- Industrial coatings have until 2019. However, please take note that the industrial paint category connotes specific B2B usage and availability. Such paint products sold over-the-counter via hardware stores may end up being used in ADH applications which is already restricted by law.
- It is also strongly advised to review packaging labels for sensitive claims.
- A joint effort (i.e., EMB, EWC, & PAPM) press conference and media campaign is being arranged awaiting the confirmation of DENR Sec. Gina Lopez.

PTC Task Force

- The Team went on a road trip to Vigan last March 10 for its first ever planning session to better enhance the program.
- PTC 2 will have added topics such as water-based enamels and tint-base systems to adapt with the changing times.
- New speakers are also being arranged with improvements on the experiment alongside the lectures.
- The venue is still at the PIPAC facility inside the Ateneo de Manila University, however, this time targeted on a Thursday. We aim to start August 3 and will run for eight (8) consecutive weeks.
- Securing CPD points for Chemical Engineers and Chemists is being worked on as well.

FDA Task Force

- We’re back in square one. The agency seeks to overrule the AO issued by then DOH Sec. Garin placing us in an even more sensitive category being labeled as “high-risk” by some nominal basis.
- We have since re-submitted our industry position paper with some updates and currently in wait for their next move.
- Meanwhile, they are pursuing post-market surveillance activities on a number of member companies. We strongly suggest to consult with us regarding possible courses of action that is aligned with our industry position.
- At this point, we are actively considering legal counsel for guidance and representation. This will incur costs that the Association needs to decide on.

Other relevant matters:

We are once again privileged to host APIC 2017 this October. The venue will be in Boracay. Your Board shall soon be making rounds to request your invaluable support.

As always, your participation, comments, and suggestions are important to us as we move towards globalization and greener innovations!

Very truly yours,

Vergel V. Dyoco
Director
Technical & Trainings Committee
